Exactly what you want – a microcentrifuge tailored to your needs

Sigma is a leading international manufacturer of laboratory centrifuges for diverse sectors, including biotechnology, pharmaceutical, medical, and environment analysis. Laboratories, institutions and companies everywhere in the world have been relying on premium Sigma quality – Made in Germany – for more than 40 years. The company stands for innovative products and development of durable, energy-efficient and especially user-friendly devices.

The compact Sigma 1-16 bench centrifuge and the refrigerated version 1-16K are specifically designed for working with microliter tubes. Their outstanding specifications and extensive range of rotors and accessories make this device series especially suitable for research applications with a medium to high volume of samples. Along with a maximum capacity of up to 36 x 2 ml, these devices boast RCF exceeding 20,600 x g, enabling shorter separation times and enhanced separation results. These proven models are used in a wide variety of microbiology applications, such as DNA, RNA or protein isolation. They also have a strong track record in clinical chemistry, paediatrics, biotechnology and bacteriology.

Clear application orientation

User-friendly, powerful and sturdy

Along with excellent specifications, the Sigma 1-16 series offers high-quality finishing and smart features. A unique feature is the motorised lid lock for convenient, effortless closing. Users also appreciate the ten programs and the high-performance cooling system of the Sigma 1-16K, including the pre-cooling function and standstill cooling.

The Sigma 1-16 and 1-16K additionally boast compact design and low-noise operation. Thanks to optimal air guidance and smart fan control, the 36-position fixed-angle rotor 12136 can be operated in the refrigerated centrifuge at maximum speed with an astonishingly low noise level (52 dB(A) maximum).

The short acceleration and deceleration times of this microliter centrifuge are equally impressive. In combination with high RCF, this avoids wait times and optimises throughput.

Both bench centrifuges are also available in IVD versions.

Sigma 1-16

- Universal microcentrifuge
- Speed range up to 15,000 rpm
- Maximum capacity: 36 x 2 ml
- Simple and convenient Spincontrol Basic controller
- Clearly organised display
- Ten programs
- Compact, space-saving device
- Short acceleration and braking times
- Low noise level
- Motorised lid lock
- Automatic lid unlocking
- Low temperature rise in continuous operation
- Durable, easy-care stainless steel chamber
- Window in lid for external speed monitoring
- Manufactured according to the latest national and international standards (e.g. EN 61010-2-020)

Sigma 1-16K

All features of the Sigma 1-16, plus:

- High-performance cooling
- Temperature setting range: -10 °C to +40 °C
- Rotor temperature control also possible at standstill
- Pre-cooling program
- Energy-efficient and low-noise fan control
- Guaranteed ≤ +4 °C at maximum speed with all rotors

Rotors and accessories

Large selection and a multitude of applications

A broad selection of fixed-angle rotors for 0.2 – 5 ml reaction tubes is available for the Sigma 1-16 series. This extensive portfolio is complemented by a haematocrit rotor for determination of the volume percentage of erythrocytes in blood samples and a rotor for centrifugation of PCR tubes.

The innovative design of the 18-position fixed-angle rotor 12118 allows it to be used not only with microliter tubes but also with all common spin column kits (minipreps). The fixed-angle rotor 12136 features a maximum capacity of up to 36 x 2 ml and a Biosafe certificate. Sigma gives customers a choice of polypropylene and aluminium rotors. Due to their better thermal conductivity, aluminium rotors are recommended for use in refrigerated centrifuges, while polypropylene (PP) rotors have better chemical resistance and are less prone to corrosion.

Sigma offers a wide range of rotors, and if desired can also produce custom accessories tailored to customer needs.

▸ p.7

Fixed-angle rotor 12135 for PCR strips

- Max. capacity: 32 x 0.2 ml PCR tubes
- Max. speed (1-16 / 1-16K): 15,000 rpm
- Max. RCF (1-16 / 1-16K): 16,602 x g
- Angle: 45°

▸ p.7

Fixed-angle rotor 12118
for spin column kits (minipreps)

- Max. capacity: 18 x 2 ml
- Max. speed (1-16 / 1-16K): 15,000 rpm
- Max. RCF (1-16 / 1-16K): 20,124 x g
- Angle: 45°

▸ p.8

Fixed-angle rotor 12024

- Max. capacity: 24 x 2 ml
- Max. speed (1-16 / 1-16K): 15,000 rpm
- Max. RCF (1-16 / 1-16K): 20,627 x g
- Angle: 45°

▸ p.8

Fixed-angle rotor 12134

- Max. capacity: 24 x 2 ml
- Max. speed (1-16 / 1-16K): 15,000 rpm

Material properties

Guideline for optimal tube selection

Due to the many factors that influence material properties, this overview is only intended as a general recommendation. There is no guarantee of the stated properties. Users should therefore carefully test materials for suitability under specific application conditions. Tubes should be discarded as soon as they show any sign of material fatigue.

Spincontrol Basic

Advanced control, intuitive operation

Spincontrol Basic is a programmable and user-friendly control unit with a clearly organised and intuitive user interface that simplifies everyday tasks in the lab. Operating parameters are entered using centrally arranged arrow buttons, and parameter settings can be changed during operation.

Spincontrol Basic can hold up to ten programs – a unique feature in its class. These user-modifiable programs can store standard routines for retrieval at any time. That makes the control unit ideal for institutions where tubes with different operating parameters must be centrifuged. Quick access to stored programs facilitates enhanced process reliability and quality of analytical results.

The high-performance cooling system provides precise control over the range of -10°C to +40°C with fine adjustment in 1°C increments. Along with the pre-cooling function, the Sigma 1-16K features standstill cooling.

Two pairs of acceleration and braking curves help to optimise separation processes. Short or pulsed runs are also possible by pressing and holding the Start/Stop button.

Premium quality

Made in Germany

The Sigma 1-16 and Sigma 1-16K meet the highest technical requirements of laboratory standards. Developed and produced at our facility in Osterode, Germany, they are high-performance, durable and energy-efficient quality products and conform to the latest safety, emissions and environmental standards. Sigma guarantees the availability of spare parts and wearing parts for at least 10 years.

Furthermore, you benefit from our extensive services portfolio, including commissioning, maintenance, device calibration and more. Our qualified service technicians are ready to provide professional maintenance and repair as well as loaner devices if necessary. All support services are designed to ensure reliability and optimise system availability.
